## Including:

- ✓ Geology
- ✓ Geophysics
- ✓ Well Construction/Drilling
- ✓ Petrophysics
- ✓ Reservoir Engineering
- ✓ Production and Completion Engineering

# 2018 UPSTREAM TRAINING PROGRAMS

## Message from the CEO:

MAT Group Ltd. is proud to have offered exceptional training programs since 2007 to enhance technical knowledge and skills set of specialists in the oil and gas industry. We invite you take advantage of our 2018 training calendar. Our catalog offers numerous upstream training courses and development programs in Iran and the region. The Oil and Gas industry faced strategic and business challenges in 2018,

lowered fuel prices forced many projects to slow and stop around the world. We are confident that in the foreseeable future national and international oil and gas companies will be efficiently stronger and more active. Lifting international sanctions from Iran and the new political environment enables a great opportunity to develop our training and consulting services globally, establish improved business collaborations and focus on new technologies. MAT Group is prepared to assist with challenges in the industry and become a leader of Workforce Development solutions. Our consulting team can help you build and implement effective projects, while our specialized training programs will improve your team's knowledge to better gain your goals. Please visit our website [www.matgroup.org](http://www.matgroup.org) for additional information and contact me directly [a\\_amidi@matgroup.org](mailto:a_amidi@matgroup.org) to discuss inquiries.

Sincerely Yours,

Ali Amidi

CEO, MAT Group Ltd.

*A. Amidi*

## Why MAT Group

MAT Group values its business relationships and constantly strives to improve specialized innovative and essential training and consultations to assist oil and gas experts succeed in these challenging economic times.

Our goal is to constantly offer the highest professional and educational standard of world-class training. MAT Group employees and agents pay attention to detail so that our clients training expectations and needs are continually surpassed.

We are able to help companies develop their workforce for future business challenges achieve business goals, enhance effectiveness, achieve compliance, mitigate risk, and improve operations. Since 2007 MAT Group has been focused on consistent, high quality learning and development for the oil and gas industry. We have grown from a hand full of instructors and workbook developers, to a global company with comprehensive learning solutions and workforce development expertise, able to address all segments of the industry-from exploration and production, to processing, pipelines, refining and petrochemicals. Our solutions cover all personnel levels, from geosciences and engineering to operations and craftspeople.

## Consulting Solutions:

- ✓ Active Industry Partner
- ✓ Design Technical Courses Based on Your Needs
- ✓ Senior Level Management Courses
- ✓ Design Training Needs Based on Competencies
- ✓ Assess Training Needs
- ✓ Succession Planning
- ✓ Design and Execution of Assessment Centers

**MAT Group Ltd.**

**International Training and Consulting Provider**

Do you have a group of individuals that need the same training at the same time? Just send an e-mail to: [training@matgroup.org](mailto:training@matgroup.org)

In-house courses allow participants to receive comprehensive training and individualized attention from top international instructors. Excellent solution to training needs with limited budgets. Using our resources, we can develop customized training programs in accordance with your needs while incorporating your company's data into the curriculum. These courses are catered to your internal employees and held anywhere you need training.

Contact us [training@matgroup.org](mailto:training@matgroup.org) to book your training program.

## In-house training solutions for your organisation

✓ Cost effective    ✓ Tailored    ✓ Convenient

## Table of Content:

### GEOLOGY

- 01) Basic Petroleum Geology
- 02) Development Geology
- 03) Carbonate Reservoirs
- 04) Integrated Carbonate Reservoir Characterization
- 05) Mapping Subsurface Structures
- 06) Naturally Fractured Reservoirs: Geologic and Engineering Analysis
- 07) Operations Geology
- 08) Advanced Reservoir Geology
- 09) Applied Subsurface Geological Mapping

### GEOPHYSICS

- 10) 3D Seismic Attributes for Reservoir Characterization
- 11) Advanced Seismic Stratigraphy: A Sequence – Wavelet Analysis Exploration – Exploitation Workshop
- 12) Applied Seismic Anisotropy for Fractured Reservoir Characterization
- 13) Basic Geophysics
- 14) Introduction to Seismic Stratigraphy: A Basin Scale Regional Exploration Workshop
- 15) Seismic Acquisition Technology in a Regulatory Era
- 16) Seismic Imaging of Subsurface Geology
- 17) Seismic Interpretation
- 18) Seismic Velocities and Depth Conversion

### PETROPHYSICS

- 19) Applied Rock Mechanics
- 20) Capillarity in Rocks
- 21) Cased Hole Formation Evaluation
- 22) Coring and Core Analysis
- 23) Foundations of Petrophysics
- 24) Integration of Rocks, Log and Test Data
- 25) Petrophysics of Unconventional Reservoirs
- 26) Shaly Sand Petrophysics
- 27) Structural and Stratigraphic Interpretation of Dipmeters and Borehole-Imaging Logs
- 28) Well Log Interpretation
- 29) Wireline Formation Testing and Interpretation

### WELL CONSTRUCTION / DRILLING

- 30) Basic Drilling Technology
- 31) Advanced Casing Design
- 32) Casing and Cementing
- 33) Cementing Practices – Cementing II
- 34) Deepwater Well Engineering
- 35) Directional, Horizontal, and Multilateral Drilling
- 36) Drill String Design and Optimization
- 37) Drilling Fluids Technology
- 38) Drilling Practices
- 39) Drilling Performance Analysis
- 40) Managing Wellsite Operations
- 41) Practical Drilling Skills
- 42) Primary Cementing – Cementing I
- 43) Well Design and Engineering

### RESERVOIR ENGINEERING

- 44) Applied Reservoir Engineering
- 45) Basic Reservoir Engineering
- 46) Capillarity in Rocks
- 47) Chemical Enhanced Oil Recovery Fundamentals
- 48) Enhanced Oil Recovery Fundamentals
- 49) Enhanced Oil Recovery with Gas Injection
- 50) Gas Reservoir Management
- 51) History Matching and Reservoir Optimization
- 52) Horizontal and Multilateral Wells: Analysis and Design
- 53) Integrated Reservoir Modeling
- 54) Naturally Fractured Reservoirs: Geologic and Engineering Analysis
- 55) Reserves Evaluation
- 56) Reservoir Fluid Properties: Preparation for Reservoir Engineering and Simulation Studies
- 57) Reservoir Management
- 58) Reservoir Management for Unconventional Reservoirs
- 59) Reservoir Modeling of Heavy Oil Resources
- 60) Reservoir Simulation Strategies
- 61) Water flooding A to Z
- 62) Advanced Well Test Analysis

### PRODUCTION AND COMPLETIONS ENGINEERING

- 63) Acidizing Applications in Sandstones and Carbonates
- 64) Advanced Hydraulic Fracturing
- 65) Applied Water Technology in Oil and Gas Production
- 66) Artificial Lift: Design and Selection
- 67) Well Completions and Workovers
- 68) Downhole Remediation Practices for Mature Oil and Gas Wells
- 69) Electrical Submersible Pumps
- 70) Flow Assurance for Offshore Production
- 71) Formation Damage: Causes, Prevention, and Remediation
- 72) Fundamental and Practical Aspects of Produced Water Treating
- 73) Gas Lift
- 74) Gas Production Engineering
- 75) Gas Well Deliquification
- 76) Horizontal and Multilateral Wells: Completions and Stimulation
- 77) Hydraulic Fracturing Applications
- 78) Multiphase Flow in Production Operations
- 79) Operations and Development of Surface Production Systems
- 80) Performance Analysis, Prediction, and Optimization Using
- 81) Production Chemistry
- 82) Production Logging
- 83) Production Operations
- 84) Sand Control
- 85) Surface Production Operations
- 86) Surface Water Management in Unconventional Resource Plays
- 87) Well Stimulation
- 88) Material Selection and Corrosion Control in Upstream Projects
- 89) Wellbore Treatments
- 90) Well Equipment and Operation for Production Engineers
- 91) Flow Measurement and Production Allocation
- 92) Production Assurance-Troubleshooting and Guidelines in Oil & Gas Production Operations
- 93) Rigless Intervention: Slickline, Coiled Tubing, Hydraulic, Workover & New Technologies
- 94) HPHT Well Completion
- 95) HPHT Well Control

# 2018 UPSTREAM TRAINING PROGRAMS

## **MAT Group Training Services:**

MAT Group Training division was established to provide a comprehensive range of upstream and downstream training programs for the petroleum industry, utilizing international experts. We design and present customized training programs according to our customer needs.

- Our 3 & 5 day practical workshop courses deliver specific and compact training programs that result in effective transfer and retention of skill, knowledge and know-how.
- We have offered programs focused on the following objectives:
- Preparing junior engineers for industrial projects
- Specialized engineering codes & standards courses (ASME, API, BS, DIN)
- In-house specialized specific engineering courses
- International industry technology specific courses

We work hard to offer world-class cutting edge superior training services in order to satisfy our clients' needs. Due to this perseverance and dedication it has been possible for us to establish and develop long lasting business relationships with our clients in training and consulting services.

## **How to Register:**

- Online through our website [www.matgroup.org](http://www.matgroup.org)
- Faxing your registration to MAT Group office (+9821 88552734)
- Emailing a completed registration form to [training@matgroup.org](mailto:training@matgroup.org)

## **Course Policy:**

- We strongly recommend early enrollment (especially to take advantage of early-bird registration discounts). Confirmation of enrollment will be sent upon receipt of payment.
- Normal course hours are 8:30 to 17 which include coffee breaks and lunch. No photography or recording of course sessions are permitted.

## **Payment, cancellation and refund policies:**

Course fees are due and payable in USD (or other agreed upon currency) upon receipt of invoice. The course fee includes tuition, course material, lunch and daily refreshment. All payments must be received prior to course commencement. Payments are accepted in the form of bank check or bank transfer. Cancellation requests by applicants should be in writing and received 30 days before the commencement of course, for the course fee to be refunded minus registration/administration cost of 200 USD.

Cancellations must be made in writing. No refunds will be made for cancellations received less than 30 days before the start of the course. Enrollment is not automatically cancelled if participant does not show up. A substitute participant may be nominated upon approval of MAT Group. MAT Group reserves the right to withdraw or postpone a course if the number of participants is not sufficient, up to three weeks prior to the course starting date. If a course is cancelled by MAT, you will receive notice by email or fax. A full refund of paid registration fees will be given or can be transferred to another MAT public course within 12 months (date of registration) of equal cost. Please keep our registration and cancellation policies in mind when arranging your travel as MAT Group does not accept liability for any costs incurred for cancellation or change of travel or hotel reservations.

# 2018 UPSTREAM TRAINING PROGRAMS

## [Accommodation and Course Venue:](#)

Courses are held at top quality hotels with excellent meeting and training facilities. MAT Group does not usually arrange hotel accommodation for participants; however we may reserve a block of rooms in the scheduled hotels to offer discounted rates for our program participants. Detailed hotel discount information will be provided upon enrollment and final confirmation.

## [Public Short Courses:](#)

The 2018 - 2019 public courses will mostly be presented in Dubai, Turkey and Iran. We have selected practical industry topics utilizing internationally renowned instructors to share the most recent developments in petroleum science and technology with their extensive experience and expertise.

### **You will benefit from:**

- Small class sizes, enhanced instructor participant communication and dynamic hands-on approaches in practical workshops
- Learn and exchange knowledge with peers within the oil, gas and petroleum community
- Take advantage of industry specific practical cutting edge and present-day technology and know-how

## [In-house Training:](#)

Requested specific courses and most public courses are also available in-house. Our experienced instructors customize a course exactly to specific training requirements.

### **Benefits:**

- Save travel time and expenses
- Choose expert instructors catered according to specific courses
- Contents are tailored to meet company requirements
- Company specific data and scenarios can be incorporated in exercises

## [Long Term Training Programs:](#)

Resources are available to develop long term training and technology transfer programs on petroleum-related subjects. Programs are tailored to individual client's needs. By taking account company requirements, objectives, background, expertise and experience, we will design an optimal balance between classroom, workshop and on-the job training program.

## [Our Instructors:](#)

We work with subject matter professional experts in order to deliver the highest quality trainings. Our seasoned experienced instructors and consultants are active in related committees, professional societies and many teach in reputable world known universities. The biography and teaching resumes of our instructors will be submitted upon our costumers' request.
